## PROFESSIONAL SUMMARY

Aspiring Data Analyst and AI professional with a foundation in Python, SQL, data analysis, and machine learning. Skilled in Pandas, NumPy, Matplotlib, MySQL, and Power BI for data preparation, analysis, visualization, and reporting. Hands-on project experience includes 7 practical projects covering customer churn, student performance, ETL workflows, media processing, fake news detection, and Python applications. Industry experience includes a Python Developer internship focused on software development and testing.

## TECHNICAL SKILLS

**Programming:** Python, C

**Web:** HTML, CSS, JavaScript, Bootstrap, Node.js

**Data & Analytics:** SQL, MySQL, Pandas, NumPy, Matplotlib, Power BI, Excel

**Tools:** GitHub

## INTERNSHIP EXPERIENCE

**Python Developer Intern - Zaalima Technologies | Remote | Completed**

- Implemented Python image-processing modules with Pillow (PIL) for image manipulation and processing workflows.
- Used Git and GitHub branch workflows to manage code changes and support team-based development.
- Integrated FastAPI with asynchronous workflows using Redis, Celery, and RabbitMQ.
- Tested and validated image-processing workflows to identify processing issues and verify output quality.
- Prepared technical documentation and supported software implementation tasks.

## COURSE COMPLETED

**Technex Cloud Networks Pvt Ltd - Course Completed**

Completed a practical course focused on Python, data analysis, SQL, Power BI, and Excel.

The course included hands-on work with dashboards and Pivot Tables for organizing, analyzing, and presenting data.

**Skills Learned: Python | Pandas | SQL | Power BI | Excel | Dashboards | Pivot Tables**

## EDUCATION

B.Tech (AI & ML) - Swami Vivekananda Institute of Technology | CGPA: 7.4 | Expected Graduation: 2026

## PROJECTS

**Cloud Infrastructure Auditor & Cost Optimizer (CLI)** - Built a professional-grade Command Line Interface (CLI) application for DevOps and FinOps teams. The tool securely authenticates with cloud providers (AWS/GCP), scans infrastructure for orphaned, underutilized, or misconfigured resources such as unattached EBS volumes, idle Elastic IPs, and oversized EC2 instances, generates detailed cost-saving reports, and provides safe cleanup commands.

**Distributed Media Processing Microservice** - Designed an event-driven workflow for asynchronous media processing. Covered image and video handling, optimization tasks, and background processing.

**Customer Churn Prediction** - Built a machine learning solution using Python and SQL to predict customer churn. Covered data preprocessing, validation, visualization, and prediction.

**Veritas Desk - Fake News Detection** | OPEN PROJECT - https://veritas-desk-app.onrender.com - Executed a rule-based news verification application that evaluates article wording and source information using explainable signals such as sensational language, clickbait phrasing, absolute claims, and source reputation.

**Student Performance Prediction** - Built a machine learning project to predict student academic performance from historical data. Covered data preparation, analysis, visualization, and model evaluation.

**Currency Converter Application** - Applied a Python application for currency conversion with input validation and structured workflow logic.

**CourseCrafts E-Learning Website** - Implemented a responsive e-learning website using HTML, CSS, and JavaScript with a user-focused interface.

## CERTIFICATIONS

- Zaalima Development Pvt. Ltd. - Certificate of Internship, Python Development (25/05/2026 - 25/08/2026)
- Zaalima Development Pvt. Ltd. - Certificate of Training, Python Development (25/05/2026 - 25/08/2026)
- ET AI Hackathon 2.0 - Certificate of Participation (issued 26/08/2026)
- IBM Python Basics

- IBM Artificial Intelligence Fundamentals
- EduBridge Service Desk Operations
- be10x AI Tools Workshop

## ADDITIONAL SKILLS

Communication | Team Collaboration | Technical Documentation | Analytical Reasoning | Attention to Detail | Task Management
